    〉 Studenten, Doktoranden, Postdocs, Professoren

speak fluent Mandarin, to translate an explanation for me: "I have brought a lot of stuff; I have to go back [to the main road] and pick it up now". This yielded (1a). Later I elicited (1b) as a simpler form.

(1) a. njɤ˩ zi˩ bi˩ zo˩ hoʳ˩
        1SG to_take to_go OBLIGATIVE DESIDERATIVE
        'I have to go and take [my luggage] now.' (Field notes, 2006)
     b. njɤ˩ bi˩ zo˩ hoʳ˩
        1SG to_go OBLIGATIVE DESIDERATIVE
        'I have to go. / I'm afraid I have to leave.' (Field notes, 2006)

The difference in the lexical tone on the main verb (in 1a: /zi˩/ 'to take'; in 1b: /bi˩/ 'to go') is reflected in the tones of the following syllables, all the way to the end of the sentence.

This book proposes an analysis of the underlying system: lexical tone categories, phonological rules that apply inside tone groups, and combination rules that apply in various types of phrases (i.e. *morphotonological* rules). As a preview of the results concerning lexical tones, (1a–1b) are provided below (as 2a–2b) with morpheme-level transcriptions indicating lexical tone by means of tone symbols supplemented by subscript letters ₐ ᵦ ꜀ to distinguish subcategories of lexical tones. The following chapters provide full details on this system, and describe how the tones of entire sentences obtain from the lexical tones.

Ahmet Bilal Özdemir · 5 months ago
Infinitive
I may have missed this, but why are we using the verbs in infinitive form?

Show less 2💬

Alexis Michaud · 5 months ago
Yes, good point! This does not follow the Leipzig Glossing Rules standard. I use it for disambiguation: verbs are always provided in the infinitive to disambiguate from nouns.
